

§ 130A-476. Access to health information.

(a) Notwithstanding any other provision of law, a health care provider, a person in charge of a health care facility, or a unit of State or local government may report to the State Health Director or a local health director any events that may indicate the existence of a case or outbreak of an illness, condition, or health hazard that may have been caused by a terrorist incident using nuclear, biological, or chemical agents. Events that may be reported include unusual types or numbers of symptoms or illnesses presented to the provider, unusual trends in health care visits, or unusual trends in prescriptions or purchases of over-the-counter pharmaceuticals. To the extent practicable, a person who makes a report under this subsection shall not disclose personally identifiable information. A person disclosing or not disclosing information pursuant to this subsection is immune from any civil or criminal liability that might otherwise be incurred or imposed based on the disclosure or lack of disclosure provided that the health care provider was acting in good faith and without malice. In any proceeding involving liability, good faith and lack of malice are presumed. Notwithstanding the foregoing, if a health care provider or unit of State or local government willfully does not disclose information pursuant to this subsection, the immunity from civil or criminal liability provided under this subsection shall not be available if the person had actual knowledge that a condition or illness was caused by use of a nuclear, biological, or chemical weapon of mass destruction as defined in G.S. 14-288.21(c).

(b) The State Health Director may issue a temporary order requiring health care providers to report symptoms, diseases, conditions, trends in use of health care services, or other health-related information when necessary to conduct a public health investigation or surveillance of an illness, condition, or health hazard that may have been caused by a terrorist incident using nuclear, biological, or chemical agents. The order shall specify which health care providers must report, what information is to be reported, and the period of time for which reporting is required. The period of time for which reporting is required pursuant to a temporary order shall not exceed 90 days. The Commission may adopt rules to continue the reporting requirement when necessary to protect the public health.

(c) Health care providers and persons in charge of health care facilities or laboratories shall, upon request and proper identification, permit the State Health Director or a local health director to examine, review, and obtain a copy of records containing confidential or protected health information, or a summary of pertinent portions of those records, (i) that pertain to a report authorized by subsection (a) or required by subsection (b) of this section, or (ii) that, in the opinion of the State Health Director or local health director, are necessary for an investigation of a case or outbreak of an illness, condition, or health hazard that may have been caused by a terrorist incident using nuclear, biological, or chemical agents.

(d) A person who makes a report pursuant to subsection (b) of this section or permits examination, review, or copying of medical records pursuant to subsection (c) of this section is immune from any civil or criminal liability that otherwise might be incurred or imposed as a result of complying with those subsections.

(e) Confidential or protected health information received by the State Health Director or a local health director pursuant to this section shall be confidential and shall not be released, except when the release is:

- (1) Made pursuant to any other provision of law;
- (2) To another federal, state, or local public health agency for the purpose of preventing or controlling a public health threat; or
- (3) To a court or law enforcement official or law enforcement officer for the purpose of enforcing the provisions of this Chapter or for the purpose of investigating a terrorist incident using nuclear, biological, or chemical

agents. A court or law enforcement official or law enforcement officer who receives the information shall not disclose it further, except (i) when necessary to conduct an investigation of a terrorist incident using nuclear, biological, or chemical agents, or (ii) when the State Health Director or a local health director seeks the assistance of the court or law enforcement official or law enforcement officer in preventing or controlling the public health threat and expressly authorizes the disclosure as necessary for that purpose.

(f) Repealed by Session Laws 2004-124, s. 10.34(a), effective January 1, 2005.

(g) In this section the following terms shall include:

- (1) "Health care provider" includes a physician licensed to practice medicine in North Carolina or a person who is licensed, certified, or credentialed to practice or provide health care services, including, but not limited to, pharmacists, dentists, physician assistants, registered nurses, licensed practical nurses, advanced practice nurses, chiropractors, respiratory care therapists, and emergency medical technicians; and
- (2) "Health care facility" includes hospitals, skilled nursing facilities, intermediate care facilities, psychiatric facilities, rehabilitation facilities, home health agencies, ambulatory surgical facilities, or any other health care related facility, whether publicly or privately owned. (2002-179, s. 1; 2004-80, s. 7; 2004-124, s. 10.34(a).)
