(a) The following definitions apply in this section:

- (1) Broadband service. – Internet access service, regardless of the technology or medium used to provide the service, with transmission speeds that are equal to or greater than the requirements for the minimum performance tier and with latency equal to or lesser than the requirements for low latency, as both metrics are provided by the Federal Communications Commission in Paragraph 39 of the report and order adopted January 30, 2020, and released February 7, 2020.
- (2) Grantee. – A satellite-based provider that has been awarded a grant pursuant to this section.
- (3) Office. – The Broadband Infrastructure Office in the Department of Information Technology.
- (4) Project area. – An area identified by a grantee and defined in a grant agreement entered into pursuant to this section that contains unserved households. A project area may also cover areas that have broadband service.
- (5) Satellite-based provider. – A broadband service provider that provides Internet access directly to consumers via satellite technology.

(6) Unserved household. – A household located in this State that does not have access to broadband service from a wireline or wireless service provider. A household that is included in an area where a grant from the Growing Rural Economies with Access to Technology (GREAT) program pursuant to G.S. 143B-1373 has been awarded is not eligible for a grant under this section.

(b) The Satellite-Based Broadband Grant Fund is created as a special revenue fund in the Department of Information Technology. Monies in the Fund do not revert but remain available to the Department for the purposes provided in this section. State funds appropriated to this Fund shall be considered an information technology project within the meaning of G.S. 143C-1-2.

(c) Applications for grants will be submitted at times designated by and on forms prescribed by the Secretary. Notwithstanding any other provision of law, if the Secretary deems some of the information in an application to contain proprietary information, the Secretary may provide that such information is not a public record, as that term is defined in G.S. 132-1, subject to public records or other laws requiring the disclosure of such information and have that portion of the application redacted. An application shall include, at a minimum, the following information:

- (1) The identity of the applicant.
- (2) An illustration or description of the project area to be served and the estimated number of unserved households in that area that will gain access to broadband service at the conclusion of deployment.
- (3) The proposed construction and deployment time line.
- (4) A description of the services to be provided, including the proposed upstream and downstream broadband speeds to be delivered, latency metrics, and any applicable data caps. Any applicant proposing a data cap below 150 Gigabytes of usage per month shall also provide justification to the satisfaction of the Office that the proposed cap is in the public interest and consistent with industry standards.
- (5) A plan to mitigate barriers to adoption by households.
- (6) The proposed advertised speed to be marketed to end users in the project area.
- (7) The proposed cost to be charged to an unserved household in the project area for subscribing to the broadband service.
- (8) Any other information or supplementary documentation requested by the Office.

(d) The Office shall determine eligibility for a grant pursuant to this section based upon the information provided in the application of a satellite-based provider, and any other information or supplementary documentation requested by the Office, and shall award grants to applicants that will provide access to the greatest number of unserved households. Applications of satellite-based providers that propose the provision of broadband service to the greatest number of unserved households situated in census tracts that have been identified as significantly unserved by the Office shall be given priority. The maximum aggregate amount of total liability for all grants awarded under this section is four million dollars (\$4,000,000). The maximum amount of total annual liability for grants awarded in any single calendar year under this section is two million five hundred thousand dollars (\$2,500,000). No agreement may be entered into that, when considered together with other existing agreements governing grants awarded during a single calendar year, could cause the State's potential total annual liability for grants awarded in a single calendar year to exceed the applicable amount. The amount of award per household for each grant year shall be equal to the product of two hundred fifty dollars (\$250.00) multiplied by a fraction, the numerator of which is the total number of full months all unserved households subscribed to and received broadband service from the grantee in the grant year and the denominator of which is 12. No broadband service to an unserved household beyond 24 months of service may be included in the calculation of an award.

Eligibility for a grant award is dependent upon the household maintaining broadband service with the grantee for at least eighty-three percent (83%) of the year in which the grantee seeks an award. No single subscription or full-year equivalent subscription may be used to calculate a grant award for more than the three-year term identified in the agreement. The total grant award for a single unserved household under this section shall not exceed five hundred dollars (\$500.00). A grantee shall submit documentation to the Office annually that will provide information sufficient for the Office to verify eligibility of subscriptions, including that the household was unserved. Payment of grant funds is subject to documentation showing eligibility of subscriptions.

(e) The Office shall require a grantee to enter into an agreement. The agreement shall contain at least all of the following:

- (1) A detailed description of the anticipated area where the grantee will deploy broadband service.
- (2) The current number of unserved households situated within the anticipated area.
- (3) The total number of unserved households the grantee anticipates subscribing to its broadband service.
- (4) A method for the grantee to report annually to the Office the number of households subscribing to broadband service offered by the grantee and for documenting that those households were previously unserved households.
- (5) A plan for the grantee to address barriers to adoption by households situated within the project area.
- (6) A provision that requires the grantee to maintain its service for the area, or another area approved by the Office, for at least five years.
- (7) A provision establishing the conditions under which the grant agreement may be terminated and under which grant funds may be recaptured by the Office.
- (8) A provision stating that unless the agreement is terminated pursuant to its terms, the agreement is binding and constitutes a continuing contractual obligation of the State and the grantee.
