

§ 106-245.22. Sanitation.

(a) Any person engaged in the marketing of or the processing of eggs for marketing shall, in addition to maintaining egghandling facilities in a manner commensurate with laws governing food establishments, keep the eggs in a proper environment, in accordance with regulations promulgated by the North Carolina Board of Agriculture, to maintain quality. In addition, any container, including the packaging material therein, when used for the marketing of eggs shall be clean, unbroken and free from foreign odor. In all instances eggs shall, so far as possible and by use of all reasonable means, be protected from being soiled or dirtied by foreign matter. When cleaning is necessary a sanitary method approved by the Commissioner shall be employed.

(b) Repealed by Session Laws 1973, c. 739, s. 3. (1965, c. 1138, s. 1; 1973, c. 739, s. 3.)
