

§ 62-46. Water gauging stations.

The Commission may require the location, establishment, maintenance and operation of any water gauging station which it finds is needed in the State over and above those required by federal agencies, and the Commission may cooperate with federal and other State agencies as to the location, construction and reports and the results of operation of such station. (1933, c. 307, s. 33; 1963, c. 1165, s. 1.)
