1

HOUSE BILL 225

Short Title: MV Window Glazing.

(Public)

Sponsors: Representatives Ellis; and Bowman.

Referred to: Judiciary III.

February 15, 1994

A BILL TO BE ENTITLED

AN ACT TO BRING THE NORTH CAROLINA STATUTES ON MOTOR VEHICLE WINDOW GLAZING INTO COMPLIANCE WITH FEDERAL LAW AND REGULATIONS.

The General Assembly of North Carolina enacts:

Section 1. G.S. 20-127 reads as rewritten:

**"§ 20-127. Windshields must be unobstructed.**

(a) It shall be unlawful for any person to drive any vehicle upon a highway with any sign, poster or other nontransparent material upon the front windshield, side wings, side or rear window of such motor vehicle other than a certificate or other paper required to be so displayed by law, or approved by the Commissioner of Motor Vehicles.

(b) No motor vehicle which is equipped with a permanent windshield shall be operated upon the highways unless said windshield is equipped with a device for cleaning snow, rain, moisture, or other matters from the windshield directly in front of the operator, which device shall be in good working order and so constructed as to be controlled or operated by the operator of the vehicle. Provided, on any vehicle equipped by its manufacturer with such devices on both the right and left sides of windshield, both such devices shall be in working order. The device required by this subsection shall be of a type approved by the Commissioner.

~~(c) The windshield, rear and side glasses of a motor vehicle must be free from discoloration which impair the driver's vision or create a hazard.~~

~~(d) On or after January 1, 1989, it shall be unlawful to operate a motor vehicle registered or which is required to be registered in this State under this Chapter, upon any~~

1 highway or public vehicular area with a windshield or a front side window to the  
2 immediate right or left of the operator, or a rear window used for visibility, which has  
3 been darkened, smoked, or tinted after factory delivery. Provided, however, after first  
4 sale of the vehicle, a single application of tinted film which has been registered with and  
5 approved by the Commissioner of Motor Vehicles shall be lawful if the manufacturer's  
6 label is implanted between the film and glass in the lower left section of each darkened  
7 window and is legible from outside the vehicle. The label shall indicate the film  
8 registration number, the name and address of the manufacturer and a certification of  
9 compliance with North Carolina law. No film or darkening material may be applied on  
10 the windshield except to replace the sunshield in the uppermost area as installed by the  
11 manufacturer of the vehicle, in which case the label shall be implanted between the film  
12 and glass in the upper left section of the windshield and be legible from outside the  
13 vehicle. A rear window shall be required for visibility on every vehicle unless the  
14 vehicle is equipped with an outside mirror of a type approved by the Commissioner  
15 which eliminates the requirement for an inside rearview mirror under the provisions of  
16 G.S. 20-126(a) and (b).

17 (e) No motor vehicle inspection certificate shall be issued on or after January 1,  
18 1988, for a vehicle on which the windshield or front window to the immediate right and  
19 left of the operator or the rear window if required for visibility, has been darkened by  
20 the installation of tinted film or by other means, except as permitted under subsection  
21 (d) of this section.

22 (f) Before shipping or making any tinted film available for installation on a  
23 motor vehicle in this State, the manufacturer shall apply to the Commissioner for  
24 approval and registration of its tinted film and for a label to be used in the identification  
25 and certification of compliance with light transmittance and reflectance standards. The  
26 Commissioner shall approve tinted film to be used in the front windows or a rear  
27 window if required for visibility if the manufacturer demonstrates that it has at least  
28 fifty percent (50%) light transmittance if it is to be used on front, side, or rear windows  
29 and a luminous reflectance of not more than twenty percent (20%). A fee shall be paid  
30 by the manufacturer with each application for film approval and registration in the  
31 approximate amount of the cost to the Division in the review of the applications.

32 (g) With any delivery of tinted film for installation in vehicles, where approved  
33 film is required, the manufacturer shall provide the required labels with written  
34 instructions and materials for permanent installation. The use of any label that is not  
35 registered, or the misuse of any registered label to mislead motor vehicle safety  
36 inspectors, law enforcement officers, or other officials shall constitute a misdemeanor.

37 (h) Subsections (d) through (g) of this section shall apply only to darkened,  
38 smoked, or tinted film installed on motor vehicle windows after factory delivery and  
39 after July 1, 1988, and shall not apply to vehicles that are registered in another state, are  
40 not required to be registered in this State, and were in compliance with the standards  
41 required in the state of registration at the time of registration.

42 (i) Subsections (d) through (g) of this section do not apply to law enforcement  
43 K-9 vehicles and films used to darken windows on those units.

1           (c) On or after July 1, 1995, no person may operate a motor vehicle that is  
2 registered or required to be registered in this State on any public highway, road, or street  
3 that has a sunscreen device or tinted film applied or affixed on the windshield, the front  
4 side wings, the front side windows adjacent to the right and left of the driver, and  
5 windows to the rear of the operator, that do not meet the requirements of this section. If  
6 no after-factory installed sunscreen device or tinting film has been added to the  
7 windows as herein described, the provisions of this section regarding light transmittance  
8 and reflectivity do not apply.

9           (d) A sunscreen device or tinting film may be used only along the top of the  
10 windshield and may not extend downward beyond the ASI line or more than five  
11 inches, whichever is closer to the top of the windshield.

12           (e) Notwithstanding subsection (d) of this section, a sunscreen device or tinting  
13 film must be a nonreflective type and may not be red, yellow, or amber in color.

14           (f) No sunscreen device or tinting film may be applied or affixed to any window  
15 other than the windshield that reduces the total light transmission of such windows to  
16 less than thirty-five percent (35%).

17           (g) No sunscreen device or tinting film may be applied or affixed to any window  
18 of a motor vehicle that has a reflectance of light exceeding twenty percent (20%).

19           (h) No motor vehicle inspection certificate shall be issued on or after July 1,  
20 1995, for a motor vehicle that is not in compliance with the requirements of this section.  
21 No inspection sticker shall be issued for a motor vehicle with any after-factory installed  
22 sunscreen device or tinting film unless the window bears the installer's sticker as  
23 required by subsection (i) of this section.

24           (i) No person or firm may apply or affix to the windows of any motor vehicle  
25 registered or required to be registered in this State, a sunscreen device or tinting film  
26 that is not in compliance with the requirements of this section. The installer shall affix a  
27 sticker between the film and the glass in the lower back corner of each glass that is  
28 visible from the outside of the vehicle, no larger than one inch by two inches which  
29 certifies compliance with this section and identifies the installer by name and street  
30 address.

31           (j) The Commissioner shall approve equipment, methods, and procedures for  
32 measuring light transmission and reflectance of sunscreen devices and tinting films.  
33 Testimony that any window of a vehicle failed to meet the light transmittance or  
34 reflectance requirements of this section using equipment, methods, or procedures  
35 approved by the Commissioner shall be **prima facie** evidence of a violation of this  
36 section. It shall be a defense under subsections (f) or (g) of this section if the operator  
37 charged produces a certification issued by a licensed safety equipment inspection station  
38 showing that the sunscreen device or tinting film met the requirements of this section  
39 when measured using equipment, methods, or procedures approved by the  
40 Commissioner. It shall be a further defense to show that any sign, poster, or other  
41 nontransparent material, discoloration, sunscreen device, or tinting film has been  
42 removed or modified so that the vehicle is in compliance with this section.

43           (k) This section shall not apply to windows behind the driver of passenger  
44 vehicles as defined in G.S. 20-4.01(27), property hauling vehicles as defined in G.S. 20-

1 4.01(31), limousines, motor homes, or law enforcement K-9 vehicles or vehicles  
2 registered in another state and in compliance with the standards required in that state.

3 (l) A violation of subsections (h) and (i) of this section shall be a misdemeanor  
4 punishable as provided in G.S. 20-176(c). A violation of any other subsection of this  
5 section is an infraction. Any person violating subsections (f) or (g) of this section  
6 during the period of October 1, 1994, through December 31, 1994, shall be given a  
7 warning of the violation only."

8 Sec. 2. G.S. 20-183.3 is amended by adding a new subsection to read:

9 "(c) No inspection certificate shall be issued by a safety equipment inspection  
10 station on or after July 1, 1995, for a motor vehicle that is not in compliance with G.S.  
11 20-127. In addition to the items listed in subsection (a) of this section, safety inspection  
12 equipment stations shall inspect the windshields, side wings, side or rear windows of all  
13 vehicles in accordance with methods and procedures approved by the Commissioner."

14 Sec. 3. This act becomes effective October 1, 1994, and shall apply to all  
15 vehicles newly registered on or after that date. Nothing in this act shall affect  
16 prosecutions or violations of this section committed on or before the effective date of  
17 this act.
