9 Insurance Fund to meet anticipated claims and to maintain an adequate
10 reserve.

11 (2) Whether automatic statutory mandates can be used to make adjustments
12 in collections in order to maintain the fund.

13 (3) What steps can be taken under existing law to curb abuses in the

18 unemployment insurance funds and determining the reasons for any
19 differences, if they exist.

20 (5) The fairness of the present formula and rates establishing employment
21 compensation, including that of basing a claimant's entitlement to
22 benefits on a movable base period that would include information on
23 wages earned from the latest available quarter rather than on wages
24 earned during the first four of the last five quarters prior to filing under
25 the current system.

26 (6) Comparing North Carolina's formula and rate of unemployment
27 compensation to those of other states.

28 (c) Licensing Boards (Little). The study may consider the following: the need for

2 (Gammons v. N.C. Department of Human Resources) (Gardner; Martin of Guilford).

3 (f) The impact of the Supreme Court's decision in Craven County Board of
4 Education v. Boyles on civil penalties, forfeitures, and fines collected by State agencies
5 (Rand and Gulley).

6 (f1) The related and vital issues of education and placement in the training
7 schools run by Division of Youth Services, Department of Human Resources, in order to
8 determine how to ensure that education and placement are adequate and appropriate for
9 all training school students, including Willie M. students.

10 (g) Allowing property tax refunds for overpayments due to clerical,
11 measurement, or computational errors in appraisal of property (S.B. 1019 - Dannelly).

24 25 PART VI.—DEHNR STUDY (Perdue)

26 Sec. 6.1. (a) The Environmental Review Commission is authorized to study the
27 following:

- 28 (1) The existing funding for the water quality program and whether
29 additional funds are needed to adequately process permit applications
30 and perform compliance inspections for all permitted facilities. In
31 determining appropriate funding levels, the Commission should review
32 the past funding levels for these programs and the increase in program
33 activities that suggest increased funds are necessary. The Commission
34 should also determine how requests for administrative positions and the
35 need to inspect newly permitted facilities have impacted the operating
36 programs.
- 37 (2) Whether the existing regulatory programs have overlap and duplication
38 between the State and federal requirements and whether environmental
39 protection can be achieved by reducing the inconsistencies between the
40 two sets of requirements. In particular, the wetlands programs and the
41 air toxics programs need to be evaluated.

- 1 (3) How environmental programs can incorporate risk assessment in
2 establishing new standards that regulate emissions and cleanup activities
3 in State programs.

10 Resources.

11 (b) The Commission shall report any findings and recommendations, including

14 PART VII.—EXPENDITURE MODEL (Odom)

15 Sec. 7.1. Expand and Upgrade the General Assembly Expenditure Model for
16 General and Highway Funds and Federal Funds. A special subcommittee of the
17 Legislative Services Commission shall be appointed to oversee and coordinate the
18 expansion and upgrade of the financial models. The President Pro Tempore of the Senate
19 shall appoint two Senate members of the Legislative Services Commission to the
20 subcommittee and the Speaker of the House shall appoint two House members of the
21 Legislative Services Commission to the subcommittee. The subcommittee shall develop
22 and issue a Request for Qualifications document to interested contractors for the purpose
23 of presenting to the subcommittee, for recommendation to the Commission, a suggested
24 approach, statement of qualifications, together with cost estimates, to prepare and
25 benchmark specific upgrades and other "user-friendly" improvements (e.g., graphics,
26 drop down lists, "windows-like" applications and "touch screen" technology) to the
27 current General Fund Financial Model and Highway Fund Financial Model.

28 These upgrades will include special components which would work seamlessly
29 with the existing models and further improve their value to legislative and executive
30 branch policymakers. To the extent that unused and unencumbered capital improvement
31 funds are available, the Legislative Services Commission may execute a competitive or
32 sole source bid process and enter into a contract with a qualified consulting or research
33 organization to assist with production and delivery of the upgrades and other
34 components described herein. In the event of limitations of funds to contract for all
35 upgrades or components, prior to the beginning of fiscal year 1997-98, the subcommittee
36 shall recommend to the Commission which projects should be considered first for
37 improvement or expansion. In addition to the upgrades cited above, the following model
38 components shall be developed:

39 (a) Compensation. A compensation component which shall simulate and estimate
40 the fiscal effect of proposed changes in salaries and benefits packages including, but not
41 limited to, social security, leave, disability, retirement, health insurance, and death
42 benefits for the following categories of employees paid by the State of North Carolina:

- 1 (1) Certified public school employees; noncertified public school
- 2 employees;
- 3 (2) University faculty and nonfaculty employees;
- 4 (3) Community college personnel (faculty and nonfaculty);
- 5 (4) Judicial employees; and
- 6 (5) All other executive branch employees.

7 (b) Federal Funds. Working with the Federal Funds Model (FFM), jointly
8 operated by the National Governors' Association and the National Conference of State
9 Legislatures, the contractor shall develop, with the Office of State Budget and
10 Management and the Fiscal Research Division, automated reports that will utilize
11 formulas to estimate the effects of increases or decreases in federal funds on General or
12 Highway Fund receipts over any successive 10-year period, including estimating where
13 possible, the effect of these changes on local government "pass-through" funding. This
14 component will be benchmarked with the FFM staff in Washington, using most recent
15 congressional actions.

16 (c) Medicaid and Other Federal Entitlements Funding. Within this Federal Funds
17 Model described in subsection (b) of this section, the Office of Budget and Management
18 and the Fiscal Research Division, working with the Division of Medical Assistance of the
19 Department of Human Resources shall develop and enhance a Medicaid expenditures and
20 receipts forecasting component for use with the General Fund Forecasting Model to
21 determine the effect of congressional decisions on the State's share of Medicaid funding,
22 and the resulting potential effect on local government share.

23 Sec. 7.2. Design, Access, Use, Maintenance, and Upgrade of Models. (a) The
24 Legislative Services Commission, at the request of the Governor, shall allow access and
25 use of the General Highway and Federal Funds Models to executive branch policy and
26 decision makers. These models may be used to illustrate, indicate, or simulate an
27 outcome or series of outcomes that reasonably may be expected to result from the
28 application of selected revenue or expenditure assumptions, conditions, or changes to a
29 current or proposed budget. These simulations shall not be deemed as formal predictions
30 or statistically reliable forecasts. [Reports of simulations may be construed as indicators
31 of potential future outcomes, if the specific assumptions used to produce the simulation
32 occurred exactly as applied.]

33 Any and all assumptions affecting estimated revenues or expenditures in any
34 State funds shall be set out clearly in any explanation of any fiscal conditions proposed or
35 simulated using the models. These assumptions or conditions shall include, but are not
36 limited to, increases or decreases in:

- 37 (1) Tax and nontax revenue;
- 38 (2) Debt service;
- 39 (3) Expenditures;
- 40 (4) Enrollments (public schools, universities, community colleges);
- 41 (5) Inflation;
- 42 (6) Inmate populations, probationers, parolees;

1 (7) Caseloads in AFDC, Medicaid, courts, public health, mental health,
2 State health plan, and other State service programs;

3 (8) Salary, wages, (private sector); and

4 (9) Other (demographics, natural disasters).

5 (b) Subject to the approval of the Legislative Services Commission, the Director of
6 the Fiscal Research Division and the State Budget Officer or the Governor shall establish
7 written procedures and standards for the design, access, use, maintenance and upgrade of
8 the models and any of their components, except that members of the General Assembly,
9 upon request, shall have direct, personal access to the models.
