11 which the real estate development is located a map or plat showing the location of the
12 control corner or corners and permanent marker or markers with adequate and sufficient
13 description to enable a surveyor to locate such control corner or marker. ~~The register of
14 deeds shall not accept for registration or record any map or plat of a real estate subdivision or
15 development made after July 1, 1947, unless the location of such control corner or corners is

17 1, 1947, shall be certified for recording pursuant to G.S 47-30.2 unless the location of
18 control corners is shown thereon."

1 Section 2. G.S. 47-30 reads as rewritten:

2 **"§ 47-30. Plats and subdivisions; mapping requirements.**

3 (a) Size Requirements. – All land plats presented to the register of deeds for
4 recording in the registry of a county in North Carolina after September 30, 1991, having
5 an outside marginal size of either 18 inches by 24 inches, 21 inches by 30 inches, or 24
6 inches by 36 inches, and having a minimum one and one-half inch border on the left side
7 and a minimum one-half inch border on the other sides shall be deemed to meet the size
8 requirements for recording under this section. Where size of land areas, or suitable scale
9 to assure legibility require, plats may be placed on two or more sheets with appropriate
10 match lines. Counties may specify either:

- 11 (1) Only 18 inches by 24 inches;
12 (2) A combination of 18 inches by 24 inches and 21 inches by 30 inches;
13 (3) A combination of 18 inches by 24 inches and 24 inches by 36 inches; or
14 (4) A combination of all three sizes.

15 Provided, that all registers of deeds where specific sizes other than the combination of all
16 three sizes have been specified, shall be required to submit said size specifications to the
17 North Carolina Association of Registers of Deeds for inclusion on a master list of all such
18 counties. The list shall be available in each register of deeds office by October 1, 1991.
19 For purposes of this section, the terms 'plat' and 'map' are synonymous.

20 (b) Plats to Be Reproducible. – Each plat presented for recording shall be a
21 reproducible plat, either original ink on polyester film (mylar), or a reproduced drawing,
22 transparent and archival (as defined by the American National Standards Institute), and
23 submitted in this form. The recorded plat must be such that the public may obtain legible
24 copies. A direct or photographic copy of each recorded plat shall be placed in the plat
25 book or plat file maintained for that purpose and properly indexed for use. In those
26 counties in which the register has made a security copy of the plat from which legible
27 copies can be made, the original may be returned to the person indicated on the plat.

28 (c) Information Contained in Title of Plat. – The title of each plat shall contain the
29 following information: property designation, name of owner (the name of owner shall be
30 shown for indexing purposes only and is not to be construed as title certification),
31 location to include township, county and state, the date or dates the survey was made;
32 scale or scale ratio in words or figures and bar graph; name and address of surveyor or
33 firm preparing the plat.

34 (d) Certificate; Form. – There shall appear on each plat a certificate by the person
35 under whose supervision ~~such~~the survey or ~~such~~plat was made, stating the origin of the
36 information shown on the plat, including recorded deed and plat references shown
37 thereon. The ratio of precision before any adjustments must be shown. Any lines on the
38 plat that were not actually surveyed must be clearly indicated and a statement included
39 revealing the source of information. ~~The execution of such certificate shall be acknowledged~~
40 ~~before any officer authorized to take acknowledgments by the registered land surveyor preparing~~
41 ~~the plat. All plats to be recorded shall be probated as required by law for the registration of~~
42 ~~deeds.~~—Where a plat consists of more than one sheet, only one sheet must contain the
43 certification and all other sheets must be signed and sealed.

1 The certificate required above shall include the source of information for the survey
2 and data indicating the ratio of precision of the survey before adjustments and shall be in
3 substantially the following form:

4 'I,, certify that this plat was drawn under my supervision from an actual
5 survey made under my supervision (deed description recorded in Book, page,
6 etc.) (other); that the boundaries not surveyed are clearly indicated as drawn from
7 information found in Book, page; that the ratio of precision as calculated is
8 1:.....; that this plat was prepared in accordance with G.S. 47-30 as amended. Witness my
9 original signature, registration number and seal this day of, A.D., 19.....

28 Nothing in this requirement shall prevent the recording of a map that was prepared in
29 accordance with a previous version of G.S. 47-30 as amended, properly signed, and
30 notarized under the statutes applicable at the time of the signing of the map. However, it
31 shall be the responsibility of the person presenting the map to prove that the map was so
32 prepared.

33 (e) Method of Computation. – An accurate method of computation shall be used to
34 determine the acreage and ratio of precision shown on the plat. Area by estimation is not
35 acceptable nor is area by planimeter, area by scale, or area copied from another source,
36 except in the case of tracts containing inaccessible sections or areas. In such case the
37 surveyor may make use of aerial photographs or other appropriate aids to determine the
38 acreage of ~~such~~ any inaccessible areas when ~~such~~ the areas are bounded by natural and
39 visible monuments. In such case the methods used must be stated on the plat and all
40 accessible areas of the tract shall remain subject to all applicable standards of this section.

41 (f) Plat to Contain Specific Information. – Every plat shall contain the following
42 specific information:

- 1 (1) An accurately positioned north arrow coordinated with any bearings
2 shown on the plat. Indication shall be made as to whether the north
3 index is true, magnetic, North Carolina grid ('NAD 83' or 'NAD 27'), or
4 is referenced to old deed or plat bearings. If the north index is magnetic
5 or referenced to old deed or plat bearings, the date and the source (if
6 known) ~~such~~the index was originally determined shall be clearly
7 indicated.
- 8 (2) The azimuth or course and distance of every property line surveyed
9 shall be shown. Distances shall be in feet or meters and decimals
10 thereof. The number of decimal places shall be appropriate to the class
11 of survey required.
- 12 (3) All plat distances shall be by horizontal or grid measurements. All lines
13 shown on the plat shall be correctly plotted to the scale shown.
14 Enlargement of portions of a plat are acceptable in the interest of clarity,
15 where shown as inserts. Where the North Carolina grid system is used
16 the grid factor shall be shown on the face of the plat. If grid distances
17 are used, it must be shown on the plat.
- 18 (4) Where a boundary is formed by a curved line, the following data must
19 be given: actual survey data from the point of curvature to the point of
20 tangency shall be shown as standard curve data, or as a traverse of
21 bearings and distances around the curve. If standard curve data is used
22 the bearing and distance of the long chord (from point of curvature to
23 point of tangency) must be shown on the plat.
- 24 (5) Where a subdivision of land is set out on the plat, all streets and lots
25 shall be accurately plotted with dimension lines indicating widths and
26 all other information pertinent to reestablishing all lines in the field.
27 This shall include bearings and distances sufficient to form a continuous
28 closure of the entire perimeter.
- 29 (6) Where control corners have been established in compliance with G.S.
30 39-32.1, 39-32.2, 39-32.3, and 39-32.4, as amended, the location and
31 pertinent information as required in the reference statute shall be plotted
32 on the plat. All other corners which are marked by monument or natural
33 object shall be so identified on all plats, and where practical all corners
34 of adjacent owners along the boundary lines of the subject tract which
35 are marked by monument or natural object shall be shown.
- 36 (7) The names of adjacent landowners, or lot, block, parcel, subdivision
37 designations or other legal reference where applicable, shall be shown
38 where they could be determined by the surveyor.
- 39 (8) All visible and apparent rights-of-way, watercourses, utilities, roadways,
40 and other such improvements shall be accurately located where crossing
41 or forming any boundary line of the property shown.
- 42 (9) Where the plat is the result of a survey, one or more corners shall, by a
43 system of azimuths or courses and distances, be accurately tied to and

1 coordinated with a horizontal control monument of some United States
2 or State Agency survey system, such as the North Carolina Geodetic
3 Survey where ~~such~~the monument is within 2,000 feet of the subject
4 property. Where the North Carolina Grid System coordinates of said
5 monument are on file in the North Carolina Department of
6 Environment, Health, and Natural Resources, the coordinates of both
7 the referenced corner and the monuments used shall be shown in X
8 (easting) and Y (northing) coordinates on the plat. The coordinates
9 shall be identified as based on 'NAD 83,' indicating North American
10 Datum of 1983, or as 'NAD 27,' indicating North American Datum of
11 1927. The tie lines to the monuments shall also be sufficient to
12 establish true north or grid north bearings for the plat if the monuments
13 exist in pairs. Within a previously recorded subdivision that has been
14 tied to grid control, control monuments within the subdivision may be
15 used in lieu of additional ties to grid control. Within a previously
16 recorded subdivision that has not been tied to grid control, if horizontal
17 control monuments are available within 2,000 feet, the above
18 requirements shall be met; but in the interest of bearing consistency with
19 previously recorded plats, existing bearing control should be used where
20 practical. In the absence of Grid Control, other appropriate natural
21 monuments or landmarks shall be used. In all cases, the tie lines shall
22 be sufficient to accurately reproduce the subject lands from the control
23 or reference points used.

24 (10) A vicinity map (location map) shall appear on the plat.

25 (11) Notwithstanding any other provision contained in this section, it is the
26 duty of the surveyor, by a certificate on the face of the plat, to certify to
27 one of the following:

- 28 a. That the survey creates a subdivision of land within the area of a
29 county or municipality that has an ordinance that regulates
30 parcels of land;
- 31 b. That the survey is located in ~~such~~a portion of a county or
32 municipality that is unregulated as to an ordinance that regulates
33 parcels of land;
- 34 c. That the survey is of an existing parcel or parcels of land;
- 35 d. That the survey is of another category, such as the recombination
36 of existing parcels, a court-ordered survey, or other exception to
37 the definition of subdivision;
- 38 e. That the information available to the surveyor is such that the
39 surveyor is unable to make a determination to the best of ~~his~~of
40 ~~her~~the surveyor's professional ability as to provisions contained
41 in (a) through (d) above.

42 However, if the plat contains the certificate of a surveyor as stated in a.,
43 d., or e. above, then the plat shall have, in addition to said surveyor's

1 certificate, a certification of approval, or no approval required, as may
2 be required by local ordinance from the appropriate government
3 authority before the plat is presented for recordation. If the plat contains
4 the certificate of a surveyor as stated in b. or c. above, nothing shall
5 prevent the recordation of the plat if all other provisions have been met.

6 (g) Recording of Plat. ~~For purposes of recording, the register of deeds shall not be~~
7 ~~responsible for.~~ In certifying a plat for recording pursuant to G.S. 47-30.2, the Review
8 Officer shall not be responsible for reviewing or certifying as to the following
9 requirements of this section:

10 (1) ~~The provisions of subsection (b);~~ Subsection (b) of this section
11 as to archival;

12 (2) ~~The provisions of subsection (d), except for the notary certificate;~~

17 ~~deeds and other conveyances, when and~~ presented for recording, shall be recorded in the
18 plat book or plat file and when so recorded shall be duly indexed. Reference in any
19 instrument hereafter executed to the record of any plat herein authorized shall have the
20 same effect as if the description of the lands as indicated on the record of the plat were set
21 out in the instrument.

22 (h) Nothing in this section shall be deemed to prevent the filing of any plat
23 prepared by a registered land surveyor but not recorded prior to the death of the
24 registered land surveyor. However, it is the responsibility of the person presenting the
25 map to the Review Officer pursuant to G.S. 47-30.2 to prove that the plat was so
26 prepared. For preservation these plats may be filed without signature, notary
27 acknowledgement or probate, in a special plat file.

28 (i) Nothing in this section shall be deemed to invalidate any instrument or the title
29 thereby conveyed making reference to any recorded plat.

30 (j) The provisions of this section shall not apply to boundary plats of areas
31 annexed by municipalities nor to plats of municipal boundaries, whether or not required
32 by law to be recorded.

33 (k) The provisions of this section shall apply to all counties in North Carolina.
34 ~~Where local law is in conflict with this section, the provisions in this section shall apply.~~
35 ~~Failure of a plat to conform in all requirements of this statute shall be sufficient grounds~~
36 ~~for the register of deeds to refuse to accept the plat for recordation.~~

37 (l) The provisions of this section shall not apply to the registration of highway
38 right-of-way plans provided for in G.S. 136-19.4 nor to registration of roadway corridor
39 official maps provided in Article 2E of Chapter 136.

40 (m) Except as provided in subsection (n), any map submitted for inclusion on the
41 public record, whether submitted alone or attached to a deed or other instrument, shall be
42 prepared by a registered land surveyor. Such a map shall either (i) have an original
43 personal signature and original seal as approved by the North Carolina State Board of

1 Registration for Professional Engineers and Land Surveyors or (ii) be a copy of a map,
2 already on file in the public record, that is certified by the custodian of the public record
3 to be a true and accurate copy of a map bearing an original personal signature and
4 original seal. The presence of the original personal signature and seal shall constitute a
5 certification that the map conforms to the standards of practice for land surveying in
6 North Carolina, as defined in the rules of the North Carolina State Board of Registration
7 for Professional Engineers and Land Surveyors.

8 (n) A map that does not meet the requirements of subsection (m) of this section
9 may be attached to a deed or other instrument submitted for inclusion in the public record
10 only for illustrative purposes and only if the map is conspicuously labelled, "THIS MAP
11 IS NOT A CERTIFIED SURVEY AND NO RELIANCE MAY BE PLACED IN ITS
12 ACCURACY."

14 adding a new section to read:
