conventional or Accepted wastewater system under actual field conditions in this State. The
Commission shall specify the circumstances in which use of the system is appropriate and any
conditions and limitations related to the use of the system. However, the Commission shall not
include more restrictive conditions and limitations established in the approval of a wastewater
system as Accepted that are not included in the approval of the wastewater system as Innovative
or as otherwise approved by rule. If the Department designates a wastewater dispersal system as
an Accepted wastewater system pursuant to this section, the following shall apply:

(1) The approval shall be limited to the manufacturer who submitted the petition
and received the Accepted status from the Commission.

(2) Neither the Commission, the Department, or any local health department shall
condition, delay, or deny the substitution of any Accepted wastewater system
based on location of nitrification lines when all parts of the dispersal field can
be installed within the approved initial dispersal field area while complying
with all Commission rules.

(i) Nonproprietary Wastewater Systems. – The Department may initiate a review of a
nonproprietary wastewater system and approve the system for use as a provisional wastewater
system or an innovative wastewater system without having received an application from a
manufacturer. The Department may recommend that the Commission designate a nonproprietary
wastewater system as an accepted wastewater system without having received a petition from a
manufacturer.

(j2) Clarification of Use of Native Backfill. – In considering the use of backfill material
in subsurface trench dispersal products, neither the Commission nor the Department shall
condition, delay, or deny the approval of a subsurface trench dispersal product based on a
non-native backfill material requirement without the prior approval of the manufacturer. With
respect to approvals already issued by the Department or the Commission that include conditions
or requirements specifying the use of non-native backfill material, the Department or
Commission, as applicable, shall reissue those approvals, at the written request of the
manufacturer, without conditions or requirements relating to the use of non-native backfill
material.
